

Incident Management Field Keys Dictionary

Official Data Mapping for Heads-Up Notification, Initial Incident Report, & Investigation Templates

1. Stage 1: Heads-Up Notification Form Keys (SLA: Within 2 Hours)

Template Form Label	API / Database Key	Data Type	Description / Allowed Values
Project Name	projectName	string	Name of active project site
Project ID	projectId	number	Internal project identifier
Date (YYYY-MM-DD)	incidentDate	string	Occurrence date e.g. '2026-08-19'
Time (24hr)	incidentTime	string	Occurrence 24h time e.g. '10:30'
Location / Building	buildingId	number	FK to Building entity
Floor / Level	floorLevel	string	e.g. 'Level 2 - Cleanroom Suite B'
Specific location	specificLocation	string	Detailed room / equipment location
Contractor(s) involved	contractorsInvolved	string	Name of contractor company
Category Checklist	categories	string[]	Near Miss, Medical Treatment, Loss Time, Environmental, Property Damage, etc.
Description what happened?	descriptionWhatHappened	string	Narrative detail of events
Consequence of incident?	descriptionConsequence	string	Immediate impact / injury summary
Environmental Incident	isEnvironmental	boolean	true if chemical/liquid spill occurred
Type of Spillage	spillType	string[]	['Oil/hydrocarbon', 'Chemical Spill', 'Paint Spill', 'Other']
Spilled Substance (SDS)	spillSubstance	string	Chemical name per SDS sheet
Cause of Spillage	spillCause	string	Root cause of liquid spill
Approximate Quantity	spillQuantity	string	e.g. '15 Liters' or '25 Kg'
System Entered	spillSystemEntered	string[]	['Rainwater', 'Process Wastewater', 'Soil', 'Asphalt', 'Other']
Immediate Actions Table	immediateActions	object[]	Array of { action, responsible, targetDate / date, timeImplemented }
Gatekeeper Informed?	gatekeeperInformed	boolean	true or false
Gatekeeper Name	gatekeeperName	string	Name of gatekeeper notified
Submitted By	submittedBy	string	Author name & role
Author Signature	signature	string	Base64 digital signature string
Approved By (Reviewer)	approvedBy	string	Name of NNE Peer Reviewer
Approver Role	approverRole	string	e.g. 'NNE Peer Reviewer'
Approver Signature	approverSignature	string	Base64 digital signature string

2. Stage 2: Initial Incident Report Form Keys (SLA: Within 24 Hours)

Template Form Label	API / Database Key	Data Type	Description / Allowed Values
Actual Severity (1-5)	actualSeverity	number	1 (Lowest) to 5 (Fatality)
Potential Severity (1-5)	potentialSeverity	number	Worst credible scenario (1-5)
High-Potential (HiPo)	isHipo	boolean	Auto-set true if potential >= 4
Investigation Level	investigationLevel	string	'L1' (5 Whys), 'L2' (Fishbone+5Whys), 'L3' (TapRoot)
Incident Photos	photos	string[]	Min 2 photo URLs (before/after for spill)
Injury/Illness Present	hasInjuryIllness	boolean	true or false
Nature Of Injury	natureOfInjury	string	Text detail of injury/illness
Treatment Prescribed	treatmentPrescribed	string	Prescribed medical treatment
Anticipated Absence	anticipatedAbsence	string	e.g. '0 days (Light duties)'
Treatment Provided	treatmentProvided	string[]	['On-Site First Aid', 'Off-Site Treatment', 'Medical Center']
Accident Categories (22)	accidentCategories	string[]	Electrocution, Crane, Cuts, Slip/Trip/Fall, Heights, Ergonomic, etc.
Injury Types (21)	injuryTypes	string[]	Abrasion, Dislocation, Concussion, Burn, Fracture, Sprain, Poisoning, etc.
Body Parts Injured	bodyPartsInjured	object	{ selections: [{ part: 'Hand', side: 'L' }], notes: '...' }
Submitted By	submittedBy	string	Name of investigator
Approved By	approvedBy	string	Name of Customer Approver
Approver Role	approverRole	string	e.g. 'Customer Approver'
Approver Signature	approverSignature	string	Base64 digital signature string

3. Stage 3: Incident Investigation Report Form Keys (SLA: Within 7 Days)

Template Form Label	API / Database Key	Data Type	Description / Allowed Values
Investigation Narrative	investigationDetails	string	Process, timelines, tools, systems reviewed
Problem Statement	problemStatement	string	Core problem statement header
Fishbone Analysis (6-M)	fishboneData	object[]	Categories: People, Machine, Method, Materials, Environment, Measurement
5 Whys Analysis Chains	fiveWhysData	object[]	[{ fishboneCauseText, why1, why2, why3, why4, why5, rootCauseSummary }]
Identified Root Causes	rootCauses	string[]	List of primary root causes
Contributing Factors	contributingFactors	string[]	List of contributing factors
Mandatory Attachments	mandatoryAttachments	object	RAMS, PTW, Witness Statements, SPA, Waste Invoice, etc.

Signatures List	signatures	object[]	[[role, name, signature, date]]
Reviewed By	reviewedBy	string	Name of NNE Lead Reviewer
Reviewer Role	reviewerRole	string	e.g. 'NNE Overall Project Manager'
Reviewer Signature	reviewerSignature	string	Base64 digital signature string
Closed By	closedBy	string	Name of person closing incident
Closure Comments	closureComments	string	Final close-out verification notes
Closure Signature	closureSignature	string	Base64 digital signature string

4. Action Items (CAPA) & UI Table Column Dropdown Filters

Template Form Label	API / Database Key	Data Type	Description / Allowed Values
Action Type	actionType	string	'IMMEDIATE' or 'CORRECTIVE'
Action Description	action	string	Text description of action item
Responsible Person	responsible	string	Name & role of responsible owner
Target Completion Date	targetDate	string	Target date e.g. '2026-08-25'
Time Implemented	timeImplemented	string	Implementation timestamp
Action Status	status	string	'PENDING' (default), 'IN_PROGRESS', or 'COMPLETED'
Updated By (Status Changer)	updatedBy / statusChangedBy	string	User name updating status/action
Status Audit History	statusHistory	object[]	Audit log array: [[status, updatedBy, timestamp, remarks]]
Filter: Classification	category	query string	GET /incidents?category=Environmental Incident
Filter: Building	building	query string	GET /incidents?building=MA
Filter: Actual Severity	actualSeverity	query number	GET /incidents?actualSeverity=2
Filter: Potential Severity	potentialSeverity	query number	GET /incidents?potentialSeverity=4
Filter: HiPo	isHipo	query boolean	GET /incidents?isHipo=true
Filter: Investigation Level	investigationLevel	query string	GET /incidents?investigationLevel=L2
Filter: Contractor	contractor	query string	GET /incidents?contractor=Give Steel
